Initialize

We want to initialize our league rules so our model can be league-specific.

```
number_teams <- 10
roster_size <- 15

# Number of players by position in starting lineup
QBs <- 1
WRs <- 2
RBs <- 2
TEs <- 1
FLEX <- 1
K <- 1
DST <- 1

# FG19 indicates field goal from 0-19 yards out, FG29 from 20-29 yards, etc.
FG19 <- 3
FG29 <- 3
FG39 <- 3
FG49 <- 4
FG50 <- 5
PAT <- 1
```
